## Professional Experience

### Hatch Engineering Inc., Portland, OR, USA

Systems Engineer

October 2018 - October 2021

Part of the Rail Systems Engineering group. Responsibilities revolved mainly around development and application of TrainOps, Hatch LTKs proprietary operations and electrical network simulation software, as well as some related field work.

- TrainOps Development: Incorporation of user feedback, documentation, beta testing.
- Postprocessing and analysis of simulation results, worked on new approaches to meet high data volumes.
- Acquisition and preprocessing of field data to build simulation scenarios.

Relevant Skills: `Python` `C++` `MatLab` `Anaconda` `Scrum`

### Siemens Transmission Solutions, Erlangen, Germany

Working Student, R&D

November 2015 - December 2017

Part of a R&D team building a test facility for a high voltage DC Switch. My task was to build a virtual workbench to allow remote charging and testing, as well as test result analysis.

Relevant Skills: `LabView` `C++` `MatLab`

### Siemens Rail Electrification, Portland, OR, USA

Trainee, Project Engineering

October 2014 - July 2015

WIP

Relevant Skills: `LabView` `MatLab`

### Siemens Infrastructure and Cities, Erlangen, Germany

Working Student, IT Infrastructure

June 2012 - September 2014

WIP

Relevant Skills: `SQL` `Linux`

## Education

- Master of Science, Maschinenbau, Friedrich Alexander Universität Erlangen-Nürnberg [2015 - 2018]
- Bachelor of Science, Maschinenbau, Friedrich Alexander Universität Erlangen-Nürnberg [2011 - 2015]

## Additional Experience

- Some of my interests and hobbies revolve around GitHub and the open source community, as well as competitive programming.
- I like to contribute to the NNFS community. This is an effort to teach understanding of Neural Networks by building them from scratch, using Python's NLTK (Natural Language Toolkit).
  - Neural Networks from Scratch
    Python | Pytorch | NumPy | Anaconda
- Masters Thesis: "Software development to calculating flight trajectories for autonomous multicopters in intralogistics"
  - This project kickstarted my passion for software engineering, specifically in regards to Open Source projects. I was tasked with the integration of position data into the drone's calculations for its flight trajectory.
  - Intrafly Project University Erlangen
    C++ | Python | ROS | Embedded Linux
- I am a Registered Yoga Teacher (RYT 200) at Yoga Alliance USA. I do not actively teach Yoga right now.
  - RYT @ Yoga Alliance

- I am an active member of german and american alpine clubs, and I like to write about my endeavours in the mountains.
  - American Alpine Club
  - Deutscher Alpenverein, Sektion Karlsbad (Update in Progress)
  - Akademischer Alpenverein München (Update in Progress)
